PROFESSIONAL SUMMARY

Full Stack Web Developer with 5+ years of experience building modern, high-performance web applications with React, Next.js, Node.js, Express, NestJS, TypeScript, and MongoDB. Founder of Palifind and the developer behind Stayopia, where I wrote the full codebase and shipped complete products end to end — authentication, Stripe payments, real-time features, REST APIs, and cloud deployment. I publish reusable React + TypeScript libraries on npm and mentor developers from zero to production through my own courses. Strong across the full delivery lifecycle — clean code, UX, CI/CD, Docker, and DNS/domain management — and always open to learning new technologies, taking on new projects, and continuously improving myself.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, Python (basic)

Frontend: React, Next.js (App Router & Server Components), Redux / Redux Toolkit, Zustand, Recoil, React Query / TanStack Query, React Hook Form, Formik + Yup, Framer Motion, i18next, SWR, Sass/SCSS, Tailwind CSS, Bootstrap 5

Backend: Node.js, Express.js, NestJS, RESTful API design & versioning, Mongoose, Prisma ORM, WebSocket / Socket.IO, real-time events, authentication & authorization (JWT / OAuth), middleware, server-side validation, Stripe payments & webhooks, file uploads, caching, cron & background jobs, error handling & logging, MVC architecture

Databases: MongoDB, MySQL, PostgreSQL

Cloud & DevOps: Git, GitHub, Docker, CI/CD, AWS, Firebase, Cloudflare, Vercel, Netlify, Render, DNS & domain management (Namecheap), deployment

Mobile: React Native, Flutter (basic)

Tools & Practices: Vite, Rollup, npm package publishing, Figma (design-to-code), Axios / Fetch, E2E testing, Agile & teamwork, clean code

WORK EXPERIENCE

Founder & Full Stack Developer | Palifind (palifind.az) — Baku, Azerbaijan

- Founded and built **Palifind**, a business discovery platform that connects local businesses with customers across multiple cities and categories.
- Developed the full stack with Next.js, React, TypeScript, and Node.js, using Prisma ORM for data modeling.
- Implemented business & customer authentication, search and category filtering, verified-business profiles, and direct contact channels.
- Managed production deployment, domain and DNS configuration, and CI/CD release workflows.

Full Stack Developer | Stayopia (stayopia.com) — Germany / Remote

- Developed and deployed a multi-service platform combining hotel reservations with on-demand food ordering and delivery (Wolt-style), owning the entire codebase and release process.
- Integrated Stripe for end-to-end payments and checkout, and Prisma ORM for the data layer.
- Implemented real-time events for live order tracking and status updates.
- Handled the full deployment lifecycle: hosting, domains, DNS, and release management.

Founder & Instructor | Azadev — “Full Stack Course” & “Zero to Product”

- Created and sell two developer programs teaching modern full-stack web development, generating recurring revenue.
- Mentor developers one-on-one and publish educational content to an audience on Instagram (@codewithazad).
- Guide students through building and shipping real, production-ready products.

Front End Developer | 166 Tech — Baku, Azerbaijan

- Designed multiple admin panels from scratch for large-scale projects.
- Built applications with Node.js, Express.js, NestJS, React, TypeScript, and MongoDB.
- Converted Figma designs into production code and tested thoroughly to ensure quality.
- Managed deployment and distribution; contributed to CI/CD and Git workflows within the team.

Full Stack Developer | Miray Invest — Turkey / Remote

- Delivered assigned frontend and backend features as an active member of the project team.
- Worked with JWT authentication, RESTful APIs, and end-to-end (E2E) testing across the stack.

Backend Developer (Node.js / Express.js) | Renovar — Turkey / Remote

- Built backend services from scratch and extended existing REST APIs.
- Contributed to RMS (Remote Management System) development and team-based delivery.

Front-End Developer | Massi — Baku, Azerbaijan

- Developed and maintained a car-sales web platform, improving frontend features and UX.

React Developer | Freelance

- Delivered React-based user interfaces for various clients on a freelance basis.

OPEN-SOURCE & PROJECTS

- **@azadev/react-toastdev** (npm) — Modern React + TypeScript toast-notification library with sound support, built with Rollup/Vite for simple, seamless integration.
- **@azadev/commit-gen** (npm) — AI-powered CLI that automatically generates commit messages for developers.
- **React Native apps (self-built)** — MP3 player, portfolio app, and a working social-media platform built from scratch to strengthen mobile development skills.

EDUCATION

Full Stack Development | Future Learn Academy — Baku

- Studied PHP, MySQL, JavaScript, and Python; built an MP3 player, e-commerce sites, and desktop apps; specialized in JavaScript.

Full Stack Development | Jed Academy — Baku

- Completed team-based projects on GitHub, managed repositories, and deployed projects to production; earned a certificate and company award.

Secondary Education | School No. 71 — Baku
